Required hangers for your artwork

Definitely not these!

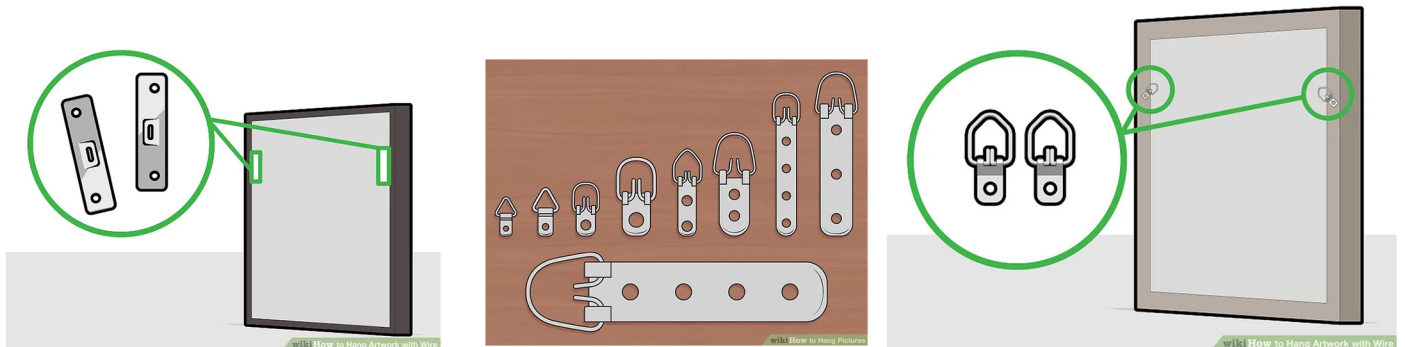

No String!

No Tape!

Use D-rings, triangle hooks or similar, securely screwed to the picture frame.

Attach them 1/4 to 1/3 of the way down the frame.
Too far down makes the picture lean out too far from the wall.

Tie the wire securely to one hook/ring, tension the wire by pulling it up in the middle, then tie to the other hook/ring.

When tensioned the middle should be at least 3cm from the top of the frame to ensure the hanging hook will not show.
